

# Water Quality et Water Supply

India been a diversified Nation not only in Religion but also in Geography. The water Qaulity been non-Uniform throughout India makes it hard for Uniformly Making a permanant solution ,with it come the distribution of water which is uneven among various classes. But there are some Critical factors which too not by natural factors, deteriorate the quality of Water. With it the Availability of water to backward classes is more or less according to the development of Each states.
